

Jelly-Tally

by NotaBotYet

**UNIVERSAL
MICROPHONE TALLY SYSTEM**

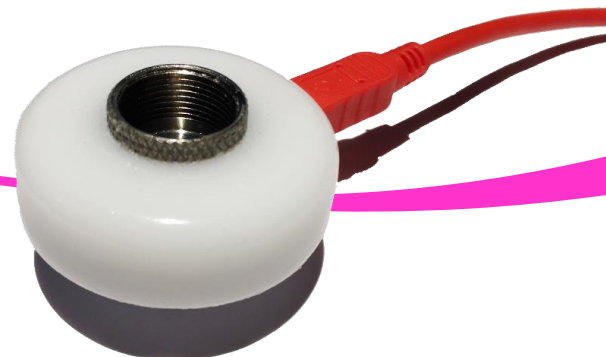

- *The Only Microphone Tally Designed to Fit ANY Mic Boom!*
- *Multicolor Programmable Effects!*
- *Controllable with Standard GPIO!*
- *Patent Pending Design!*

Sometimes you just need a little extra Jelly in your microphone Tally! That is why we invented the Jelly- Tally Universal Microphone Tally System. No more BORING plain red or white Tally Lights. How about animated multicolors or even rainbow effects? But, if standard red is your cup of tea, then no problem, it does that too! Use the white strobe for ringing phones, or animated green for cueing talent, or just MULTICOLOR FUNKADELIC rainbow light motion for the heck of it!

MICROPHONE TALLY
SYSTEM**

Jelly-Tally

by NotaBotYet

INTELLIGENT Controller

- Microcontroller provides intelligence to the controller
- Control using standard GPIO
- Input GPIOs determine which of the 32 modes are displayed

EASY TO INSTALL

- Indicator screws onto any standard microphone mount thread
- Easy to use connections
- RJ-45 control pinouts match *NotaBotYet Axia Breakout* (Part #A15-B01-2)
- RJ-45 control can connect directly to Wheatnet-IP logic port
- RJ-45 can use simple GPIO closures to ground for control

EASY TO MOUNT

- Controller is in small case with easy access to connections
- Mount under counter, on wall, in rack, or anywhere!
