

Howler Monkey

By  NotaBotYet

4 Port Power Injector

Part # N22-PWR-1

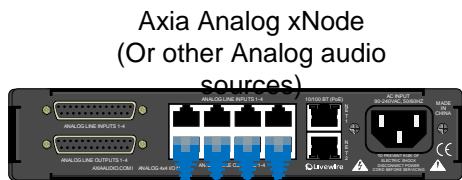

The Perfect Companion for the Howler Monkey Headphone Amp.

The NotaBotYet Power Injector for Howler Monkey Headphone Amps (Part# N22-PWR-1) is the perfect companion to your installation. Imagine that you just purchased four new Howler Monkeys for your new studio, and you want a much cleaner installation without all the extra power connections. The NotaBotYet Power Injector for Howler Monkey Headphone Amps will power all 4 Monkeys and reduce the wiring requirements in any studio.

Overview:

A passive audio passthrough design with +12V power injection onto the proper pairs of the RJ-45 to provide clean power to the Howler Monkey Headphone Amplifier. A new 2 amp power supply is included and can provide power for up to four headphone amplifiers.

Audio inputs 1 through 4 follow the StudioHub+ wiring standard while audio and power outputs also follow the StudioHub+ standard but with +12V power instead of +-15v.

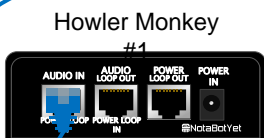

Axia Analog xNode
(Or other Analog audio sources)

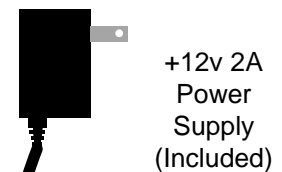

Howler Monkey Power Injector

Analog Audio THROUGH OUT with +12v Power

Analog Audio INPUT on RJ45 Connectors using Industry Standard Pinouts

Up to 4 Howler Monkeys can be powered by one Power Injector.

+12v 2A Power Supply (Included)
